<sup>i</sup> Shaded Individual Data Element Names provide essential context for related Sub-element Names but do not obligate providers to submit any associated data for that specific Data Element on the enrollment form/system. Individual Data Element Names that are not shaded do obligate the provider to submit associated data.

<sup>ii</sup> There are eight Data Element Groups (DEG). Each DEG represents a set of data elements that may need to be collected more than once for a specific context. Multiple uses of the same DEG to collect the same data for another context are allowed by this rule and do not constitute a non-conforming use of the CORE-required Maximum Enrollment Data Set.

<sup>iv</sup> CCD+ transaction cannot be used to make payments to or from financial institutions outside the territorial jurisdiction of the United States. Effective September 18, 2009, Nacha introduced the use of the International ACH Transaction (IAT) standard. The IAT standard applies to all consumer, corporate and government payments that involve a financial institution outside the territorial jurisdiction of the United States (US). The territorial jurisdiction of the US includes all 50 states, the District of Columbia (DC), US territories, US military bases and US embassies in foreign countries. A foreign address is not an indicator of whether the payment is an IAT. Source: NACHA 2011 Operating Rules and Guidelines.

<sup>ix</sup> A Taxpayer Identification Number (TIN) is an identification number used by the Internal Revenue Service (IRS) in the administration of tax laws. It is issued either by the Social Security Administration (SSA) or by the IRS. A Social Security number (SSN) is issued by the SSA whereas all other TINs are issued by the IRS. <https://www.irs.gov/individuals/international-taxpayers/taxpayer-identification-numbers-tin>

<sup>x</sup> An atypical provider not eligible for enumeration by an NPI must supply its EIN/TIN.
